

## mediaJET® Photo Board | Matt photo and posterboard

---

### Product description

Strong photo & fine-art cardboard, premium matt coated, with a special soft matt inkjet coating, for an absolutely reflection-free image reproduction, optimised flatness due to printable reverse side coating. No more mounting necessary.

### Specific feature

mediaJET Photo Board removes the need for subsequent lamination of the prints. After the printing process, the printout is ready and can be framed or used as a display. No time has to be spent on further processing, for example, lamination. The printable side of this board is specially coated to meet the needs of the discerning user, making it suitable for limited editions, giclées, original digital art prints, photo printouts, reproductions of historical photographs and all printed products whose appearance and surface require high quality. The Photo Boards of the mediaJET Collection achieve a harmonious high colour intensity and exact sharpness with both pigmented and dye-based inks.

### Processing

To guarantee optimal quality, photo and fine art papers should be stored and processed in a climate with 30-70% relative humidity and at temperatures from 15-30°C. We recommend that the paper be acclimatised in the print room for one day before printing, and to reseal in the original package after printing. Prevent fingerprints on the coated side by wearing clean cotton gloves while processing. Please avoid contact with solvent, glue and softener, leads to yellowing.
