

mediaJET® Polyfoto G | White-high-gloss Classic Display Film

Product description

A classic display film, similar to the traditional CibaChrome, with the highest degree of gloss. The pure white colour and the very good opacity are characteristics. This special PET film delivers the best results in terms of rich colours, large colour space, high resolution and excellent edge sharpness. Due to its absolute dimensional stability and best flatness, this film is ideal for representative advertising, roll-up and display prints.

Specific feature

mediaJET Polyfoto G stands out through its high-quality finish and its excellent reproduction of photographs and graphics. The polyester film, with its matt reverse and antistatic properties provides optimum operating characteristics, excellent flatness and is perfect for laminating. mediaJET Polyfoto G has a special inkjet layer that enables full colours, neutral grey tones and high brilliancy on a high-gloss picture carrier. The completely homogeneous surface emphasises the soft colour transitions at high resolutions and awesome edge sharpness, producing a vibrant image effect that is sure to impress.

Processing

To guarantee optimal quality, photo and fine art papers should be stored and processed in a climate with 30-70% relative humidity and at temperatures from 15-30°C. We recommend that the paper be acclimatised in the print room for one day before printing, and to reseal in the original package after printing. Prevent fingerprints on the coated side by wearing clean cotton gloves while processing. Please avoid contact with solvent, glue and softener, leads to yellowing.

Technical specification

Material:	Film	Colour L:	96,05
Application Area:	outdoor, if further processed	Colour a:	0,1
Surface:	gloss	Colour b:	-5,3
Specific gravity:	220,00g/m ²	Specular gloss:	> 54% (60°)
Thickness:	170,00µm	Cold lamination:	yes
B1-cert.:	no	Heat lamination:	yes
		DIN ISO 16245:	no
