

mediaJET® Canvas Alexandria | genuine canvas-linen, matte

Product description:

A unique matte textured canvas, for high-quality art reproductions and professional image printing. With a natural-looking fine canvas structure in tear-resistant 2:1 cross-binding, you can create art prints with exceptional color space and high densities. Due to the lack of optical brighteners, there are no color shifts.

Specific feature:

The ideal canvas for elegant fine art and art reproductions at the highest level. Canvas Alexandria is a one-sided, matte canvas fabric with a 2:1 fabric structure for demanding art applications. This fine inkjet canvas is particularly suitable for high-quality image presentations, graphics, art and photo reproductions, which are characterized by deepest black values (D-max) and an absolutely remarkable color space. The natural structure of the fabric remains permanently preserved for the viewer. Thanks to the modern and durable inkjet coating, with a complete dispensation of annoying optical brighteners, very good water-resistant art prints can be created on many output devices/inks, free of metamer effects and color shifts. Due to its strength, the material can be mounted on wedge or tensioning frames in production-safe and dimensionally stable even in the largest image formats. The canvas is very resistant to scratches and abrasion, it will not crack or tear when it is clamped.

Processing:

For quality reasons, the processing and storage of Canvas Alexandria should take place in a climate of 35-65% relative humidity and at a temperature of 10 to 30°C. Store in the original packaging in a cool, dry place, clean and dust free. A 24-hour climate adaptation in the processing area is recommended. Attention: turn of the automatic cutting option on your printer! We recommend you feed approximately 50 cm of the media out before printing and cut manually after printing.

Technische Daten

Material:	Canvas	Opacity:	98 %
Application Area:	only indoor	Color L:	96,5
Surface:	matte	Color a:	0,7
Specific gravity:	370,00 g/m	Color b:	-0,8
Thickness:	410,00 µm	ph-value:	6,7 ±0,5 -log(H+)
can be sewn:	yes	Webart:	2:1
can be eyeletted:	yes	Optical brighteners:	none
can be stretched:	yes	Inks:	Aqueous dye, pigment, Latex
water resistant:	yes	Pinhole free:	100 %
scratch resistant:	yes	Poly-/Cotton-Mix:	65 % / 35 %
